

PRODUCT INFORMATION

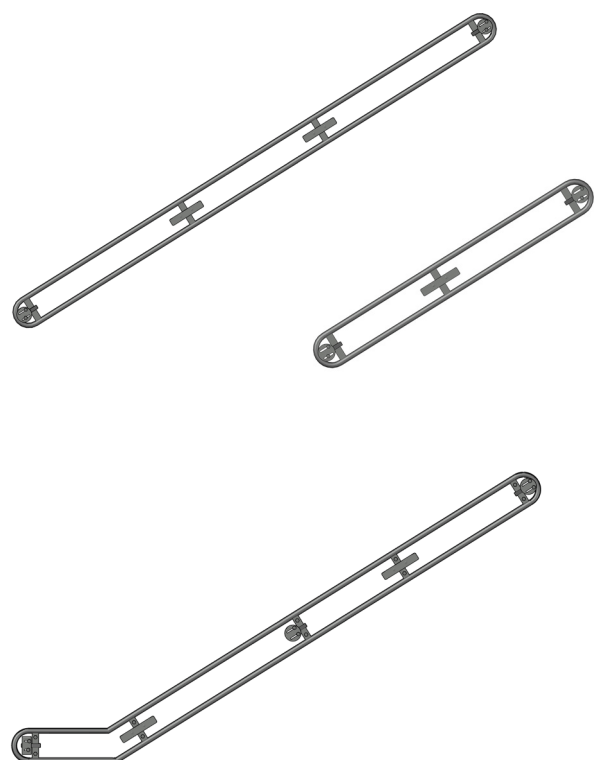

Children's handrail for child proof guard rails

The hot-dip galvanized component ensures the subsequent assembly of an additional handrail 57/77 mm above the stairway. The height is predetermined by using the existing holes in the child proof guard rails. The intermediate fasteners are enclosing the filling bars. The closed form of the railings ensures that loops of clothing or items carried with cannot be threaded. The clear walkway is reduced by 77 mm per guard rail.

Code	Description	Dimension (cm)	Weight
5FA2135301	Handrail	L300 / H200	11.8 kg
5FA2135303	Handrail	L150 / H100	6.6 kg
5FA2135311	Handrail bend, right	L300 / H150	14.5 kg
5FA2135321	Handrail bend, left	L300 / H150	14.5 kg

ADVANTAGES

- ✓ Closed ends to prevent threading.
- ✓ Encloses filler bars of the child proof guard rails.
- ✓ Additional handrail for children with two different heights.

APPLICATION
