

PRODUCT INFORMATION

Steel deck 45°

Steel decks used for closing corners of 45°, e.g. when erecting scaffolding around round buildings or components with rectangular scaffolding structures.

By connecting on the face side to the tubular supports B 32, the decks in the claw division fit into the systems plettac contur and assco futuro. It is also possible to place the coverings sideways to the main bays on to the ledgers or double ledgers. The load capacity of the ledgers must be checked beforehand.

Code	Description	Dimension (cm)	Weight
5FA2048901	Steel deck 45°, 2 deck	W64	11.1 kg
5FA2048912	Steel deck 45°, addition for 3 deck version	L133 / W24	9.9 kg
