

PRODUCT INFORMATION

Steel deck RE W32, SL-Support

In addition to the advantages of the plettac steel deck, the optimized RE steel deck offers a more favourable strength-to-weight ratio thanks to the use of high-strength steel and the optimization of the cross-section. The reinforced head fittings protects against deformations by improper handling. The integrated carry-handles are optimizing the handling at the construction site. The RE steel deck offers a weight reduction of up to 1 kg depending on the length of the deck.

Article-No.	Description	Dimensions (cm)	LC	PU	Weight
5FSLR47000	Steel deck RE, SL-Support	L300 / W32 / H7.6	4	36	19.1 kg
5FSLR47001	Steel deck RE, SL-Support	L250 / W32 / H7.6	5	36	16.3 kg
5FSLR47002	Steel deck RE, SL-Support	L200 / W32 / H7.6	6	36	13.5 kg
5FSLR47003	Steel deck RE, SL-Support	L150 / W32 / H7.6	6	36	10.4 kg
5FSLR47011	Steel deck RE, SL-Support	L139 / W32 / H7.6	6	36	9.9 kg
5FSLR47010	Steel deck RE, SL-Support	L125 / W32 / H7.6	6	36	9.1 kg
5FSLR47004	Steel deck RE, SL-Support	L110 / W32 / H7.6	6	36	8.0 kg
5FSLR47007	Steel deck RE, SL-Support	L74 / W32 / H7.6	6	36	6.2 kg

Dimensions of package unit with 36 decks 71 cm high and 107 cm wide.

Proven plettac - hole pattern for highest demands with high slip resistance.

Packages are stackable into each other or on top of each other. Very good stackability also possible with steel decks in older version.
