

PRODUCT INFORMATION

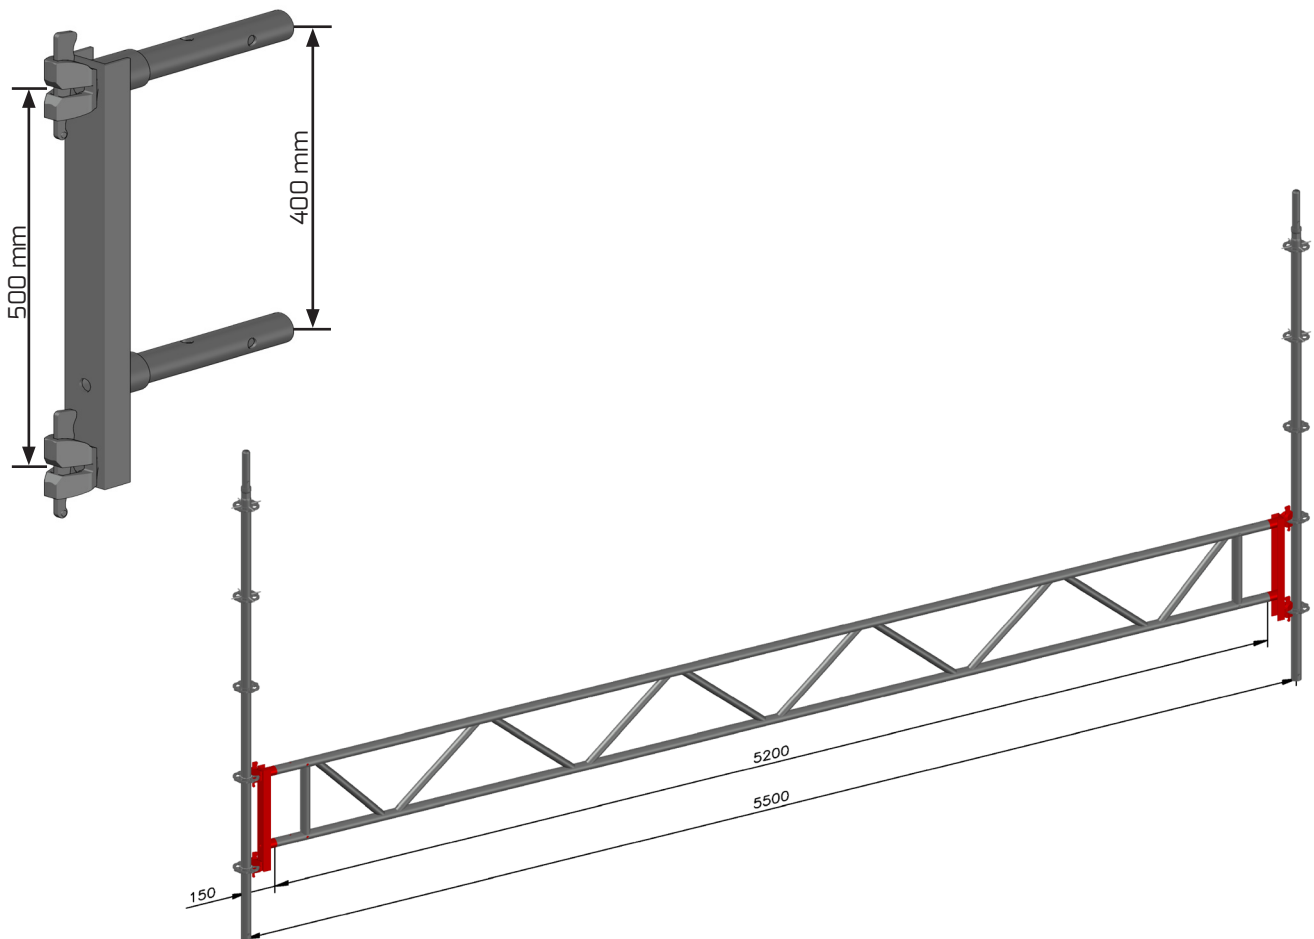

Adapter for Lattice Girders

Adapter for the installation of non-system Lattice Girders H40, height 45 cm, to the modular scaffolding plettac contur.

The non-system lattice girders in the lengths of 3,20 bis 8,20 m can be assembled to the plettac contur modular scaffold using pairs of this adapter. By means of the adapter, the bridging length of the lattice girders is increased by 30 cm. Two adapters are required for each lattice girder.

Lateral reinforcing of the lattice girders is necessary according to the statical assessment by a skilled person.

Code	Description	Dimensions (cm)	Weight
5FA1635700	Adapter for Lattice Girders to the modular scaffolding plettac contur	L320 bis L820/ H40	6,5 kg

With sufficient load-bearing capacity of the connected structures (bridging and /or support), each adapter for lattice girders enables a vertical shear capacity $F_v = 20$ kN. The value refers to the characteristic value of the effect (service/working load).

Dimensions in mm /Errors and technical changes reserved.
