

# PRODUCT INFORMATION

## Mesh Panel for Pallet for Tubes. 85 x 85

The mesh panel is an extension for the standard pallet 85 x 85 w/ posts. The side panels and wooden floors are removable.

The side panels are identical and can be used in pairs. The side panel pairs are installed opposite of each other in the pallet for tubes. They hook into each other and at the same time embrace the posts.

The floors are placed at the bottom edge of the first side panel and are secured against displacement. The easy assembly kit enables an easy and space-saving transport of empty pallets to and from the construction site.

Code	Description	Quantity per kit	Dimensions (cm)	Weight
5FA2150204	Mesh Panel for palette 5FSOG11501	4	W77,4 / H63,5	5,54 kg
5FA2150208	Floors for the pallet w/ mesh panels (5 pcs. per pallet)	5	W15 / H85,5	1,53 kg

### ADVANTAGES

- ✓ Cranable for near-ground transport
- ✓ Stackable w/ pallets 85 x 85 w/ socket tubes
- ✓ Space-saving logistics
- ✓ Transport for small components

### APPLICATION
