

PRODUCT INFORMATION

Platform Ledger futuro

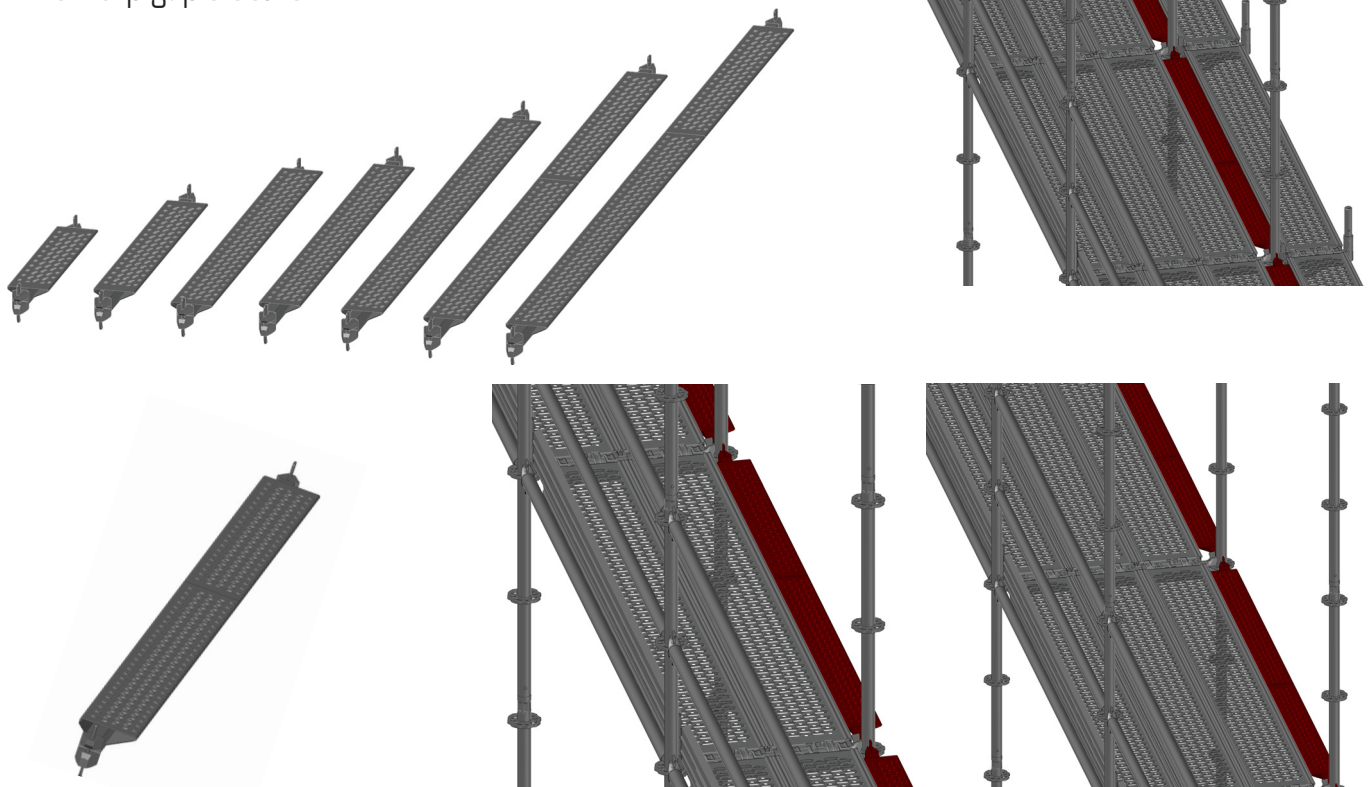

The Platform Ledger is a robust deck element for closing the gap between the bay on the side bracket. Perforated non-slip surface by a cover plate, which is welded directly to the support profile and hot-dip galvanized. It is connected to the joint instead of the ledger. The unsymmetrical design enables the adjustment (to different sized gaps) for 2- or 3-deck widths.

Code	Description	Dimensions (cm)	Weight
5FA1933201	Platform Ledger futuro, tubular-support	L307	20,98 kg
5FA1933202	Platform Ledger futuro, tubular-support	L257	17,58 kg
5FA1933203	Platform Ledger futuro, tubular-support	L109	7,01 kg
5FA1933204	Platform Ledger futuro, tubular-support	L73	4,96 kg
5FA1933205	Platform Ledger futuro, tubular-support	L207	14,22 kg
5FA1933206	Platform Ledger futuro, tubular-support	L157	10,83 kg
5FA1933207	Platform Ledger futuro, tubular-support	L140	10,14 kg

ADVANTAGES

- ✓ Easy installation
- ✓ Secure fastening
- ✓ Non-slip gap closure

APPLICATION
