

PRODUCT INFORMATION

Grandstand systems

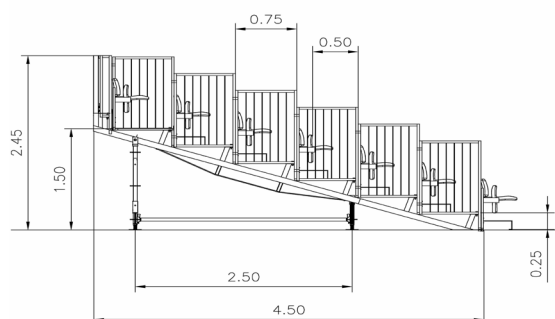

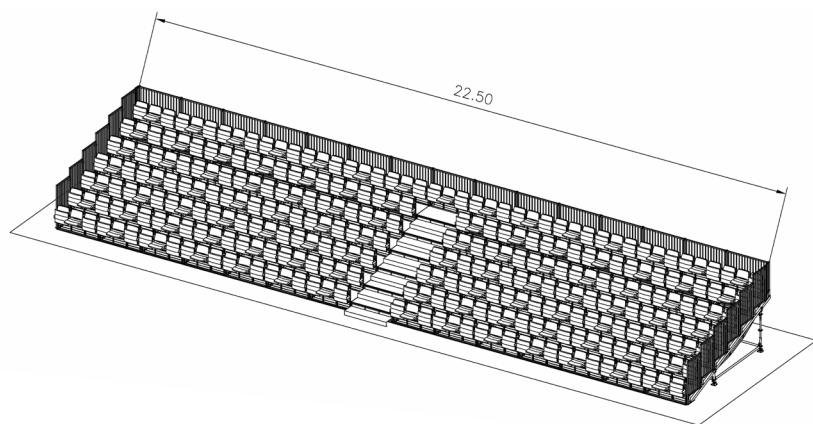

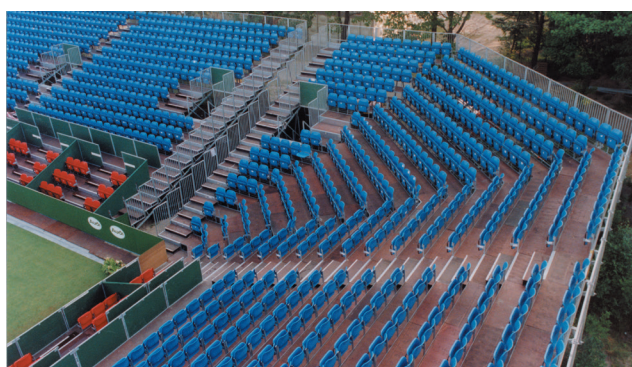

The ALTRAD plettac assco Grandstand system can be assembled by a quick and logical connection method of a few, modular components. The substructure consists of the modular scaffolding system plettac contur, which grants flexibility and high loading capacities. All mandatory technical approvals for the modular scaffolding system have been granted by the Deutsches Institut für Bautechnik (DIBT).

Please find following an example for an ALTRAD plettac assco grandstand with 297 seats:

Technical data:

Distance: seat-seat:	50 cm
Distance: rank-rank	75 cm
Vertical height: rank-rank	25 cm

- Robust plastic-tip-up seat
- Closed plywood deck
- Constructive structure: hot-dip galvanized
- Absolute suitable for outdoor use
- Sophisticated logistic system
- Adjustment to complex undergrounds possible, because of the modular scaffold supporting structure
- Extension-/ Reduction-grid:
 - sidewise: 1,5 m – 3 seats
 - backwards: 3,0 m – 4 ranks (maximum 39 ranks)

Errors and technical changes reserved.
